**ORTHO DERMATOLOGICS EXPANDS CASH-PAY PROGRAM, DERMATOLOGY.COM**

RALEIGH, N.C., Feb. 18, 2020 – Ortho Dermatologics, one of the largest prescription dermatology health care businesses, today announced an expansion of [Dermatology.com](https://www.dermatology.com), the first and only non-reimbursed, cash-pay program in dermatology in the United States. Four products have been added to the program, which include RENOVA® (tretinoin cream 0.02%), LOPROX® shampoo (ciclopirox 1%), SOLODYN® (minocycline hydrochloride) extended release tablets and the program’s first over-the-counter option, BenzEfoam® (benzoyl peroxide emollient foam 5.3%/9.8%). A new telemedicine platform has also been added, offering patients the ability to consult with a health care professional, order and potentially receive a prescription on-demand for many of the branded dermatology products available in the program.<sup>1</sup> Some products, such as SOLODYN® (minocycline hydrochloride) extended release tablets, EFUDEX® (fluorouracil) topical cream, 5%, and ALDARA® (imiquimod) cream, 5%, which are for more serious skin conditions, will require an in-office visit instead.

“We launched Dermatology.com in March 2019 to provide physicians and patients access to proven, branded treatment options for certain disease states that typically encounter coverage hassles and challenges like acne and barrier repair,” said Bill Humphries, president, Ortho Dermatologics. “Now, with the telemedicine platform, the program is making it possible for patients to receive high-quality, well-known, FDA-approved treatments in a convenient, on-demand manner while, at the same time, ensuring patients are directed to see a board-certified dermatologist when their skin conditions require an in-office visit.”

To use the new telemedicine service<sup>1</sup> on Dermatology.com, patients are required to submit a photo of their skin-related need and other information on their health, medical history and lifestyle via their mobile device or desktop. Once the submission is placed, which takes approximately three minutes, the patient will receive an email confirmation stating that their submission is being reviewed by a health care provider. These health care providers include nurse practitioners, physician’s assistants and dermatologists – all of whom are licensed or board-certified to treat dermatologic conditions.

Typically within 24 hours, the health care provider will either provide the patient with a prescription based on the assessment by the health care provider, or recommend the patient visit a board-certified dermatologist if the skin condition warrants an in-person consultation. To help these patients connect directly to a board-certified dermatologist, the site will feature a direct link to the American Academy of Dermatology Association’s Find a Dermatologist locator.<sup>2</sup>

Since its launch in March 2019, Dermatology.com has helped thousands of patients get straightforward access to branded dermatology products at fixed prices through participating pharmacies, including all Walgreens U.S. retail pharmacies. In total, there are 15 branded prescription and over-the-counter products available in the program, which include some of the company’s iconic brands, including RETIN-A® (tretinoin) cream and EFUDEX® (fluorouracil) topical cream, 5%, as well as newer products

such as ALTRENO® (tretinoin) Lotion, 0.05%.
